World History and Geography Vocab Review – Unit 1

Directions: next to each word or phrase write a definition first, then an example in the columns to the right of the term. A good definition often has two parts: a *category or group* that the term belongs to, and some *details* that separate it from other terms in that category. You can see both of these parts underlined in the sample definition. If it helps you, you could underline these parts in your own definitions. The example does not have to be a question: it may be a specific event, object, group of people or idea.

Word	Definition	Example
Geography	A <u>field of study</u> that <u>focuses on change and similarity in different places.</u>	Why did ancient civilizations first appear close to the equator, but not far to the north or south?
Pastoral		
Nomad		
Systematic Agriculture		
Domestication		
Polytheistic		
Patriarchal		
Mandate of Heaven
